Kanwer,

Sorry I missed the call today. We had a 20KV near miss that needed to be addressed.

Regarding the topic of Lone Worker, we are currently testing a system with our Wastewater Maintenance crew. It is from a company named Blackline. The device detects a fall of and no motion from the worker. It also is intrinsically safe. You can set the sensitivities on the monitor. If the signal is sent and it isn't a false alarm that is cleared by the operator, a cascade of steps begins. The steps can be built specifically for your utility. Our monitor first checks with the employee wearing the device to see if it was a false alarm. If no response (the device can text and call), the system contacts the employee's supervisor, if no response from the supervisor, the next call goes to 911/EMS and the GPS coordinates are sent to them.

The device can also accommodate the 4-gas confined space gas detection onto the monitor. The monitor is about the size of a cell phone.

The feedback from our folks has been very positive.

If anyone is interested in learning more about the equipment, please let me know (rkalkman@hollandbpw.com) and I'll forward your information to our in-house expert.

Again, my apologies for missing the meeting! I hope everyone has a great afternoon.

Thanks,
Rene

My apologies, I had to move this meeting by 30 minutes to accommodate an urgent client meeting. We would like to discuss what everyone is doing for **Lone Worker Program**. As this topic affects most of us in Water/Wastewater sector, please make every effort to attend and share your experience with the group. Talk to you all on Tuesday.
